Career Summary

6+ years of experience architecting, designing, and developing enterprise-scale .NET solutions with expertise in microservices, cloud-native applications, and technical leadership. Proven track record in designing resilient systems, mentoring development teams, and implementing architectural patterns (SOLID, DDD, CQRS). Skilled in requirement engineering, system design, DevOps practices, and modern development tools.

Experience

Software Engineer | US-Bangla Airlines

Aug 2026 - Present

- Architect and design enterprise-scale OTA platform with microservices architecture, handling high throughput for flights, hotels, and travel services.
- Lead technical design decisions and establish coding standards, design patterns (SOLID, DDD) across development team.
- Mentor junior and mid-level engineers, conduct code reviews, and ensure architectural consistency.
- Design and implement RESTful and event-driven APIs utilizing async/await patterns for optimal performance.
- Optimize database queries and implement caching strategies (Redis) to reduce latency.
- Collaborate with product and DevOps teams to establish CI/CD pipelines and deployment strategies.

Skills: C#, ASP.NET Core, .NET 6+, Microservices, REST APIs, Entity Framework Core, SOLID Principles, Design Patterns, Microsoft SQL Server, Async/Await, Performance Optimization, Caching, Git, Agile, Code Review Leadership.

Software Engineer | TechnoNext Software Limited

Oct 2024 - Aug 2026

- Architect and design enterprise-scale OTA platform with microservices architecture, handling high throughput for flights, hotels, and travel services.
- Lead technical design decisions and establish coding standards, design patterns (SOLID, DDD) across development team.
- Mentor junior and mid-level engineers, conduct code reviews, and ensure architectural consistency.
- Design and implement RESTful and event-driven APIs utilizing async/await patterns for optimal performance.
- Optimize database queries and implement caching strategies (Redis) to reduce latency.
- Collaborate with product and DevOps teams to establish CI/CD pipelines and deployment strategies.

Skills: C#, ASP.NET Core, .NET 6+, Microservices, REST APIs, Entity Framework Core, SOLID Principles, Design Patterns, Microsoft SQL Server, Async/Await, Performance Optimization, Caching, Git, Agile, Code Review Leadership.

Software Engineer | Velwire Ltd

Nov 2022 - Sep 2024

- Led development of MyVelwire office management platform serving 50+ clients; architected modular system design for scalability.
- Designed and implemented CQM (Citizen Queue Management) system with advanced scheduling algorithms and real-time notifications.
- Established architectural best practices including repository pattern, dependency injection, and SOLID principles across the codebase.
- Optimized data access layer, reducing API response times by 40% through query optimization and strategic caching.
- Mentored team of 5+ developers on advanced .NET patterns, code quality, and testing methodologies.
- Participated in infrastructure planning and deployment optimization for improved CI/CD pipeline.

Skills: C#, ASP.NET Core, .NET, Microservices Architecture, REST APIs, Entity Framework Core, Repository Pattern, Dependency Injection, Query Optimization, Caching Strategies, Team Leadership, Code Review, Git, Agile/Scrum.

Junior Software Engineer | Tulip-Tech Ltd

Mar 2021 - Oct 2022

- Contributed to STREAMSTUDIO, a secure webcast platform serving enterprise clients with real-time streaming capabilities.
- Developed and maintained core features using ASP.NET Core and C#, following SOLID principles and clean code practices.
- Designed RESTful APIs with comprehensive documentation and versioning strategies.
- Implemented comprehensive unit tests using xUnit and integration tests to ensure code quality and reliability.

- Evaluated and integrated new technologies (WebAssembly, modern frameworks) for architectural improvements.
- Collaborated with DevOps team on deployment optimization and troubleshooting production issues.
- Mentored junior developers and participated in code review processes.

Skills: C#, ASP.NET Core, .NET, RESTful APIs, Entity Framework Core, WebAssembly, xUnit Testing, Linq, MongoDB, Microsoft SQL Server, SOLID Principles, Git, Jira, Agile Methodologies.

Junior Software Engineer | Optimum Solution and Services

Feb 2020 - Feb 2021

- Developed HRMS and Pharmacy Management systems using ASP.NET MVC and ASP.NET Core, serving multiple clients.
- Built user interfaces with Razor views, jQuery, AJAX, Bootstrap, and CSS to deliver responsive web applications.
- Optimized T-SQL queries and implemented stored procedures, functions, and views for efficient database operations.
- Worked with both ADO.NET and Entity Framework for data access layer implementation.
- Participated in requirement analysis and provided technical documentation for project deliverables.
- Debugged complex issues and optimized application performance across HRMS and Pharmacy modules.
- Collaborated with cross-functional teams in an Agile/Scrum environment.

Skills: C#, ASP.NET MVC, ASP.NET Core, T-SQL, Entity Framework, ADO.NET, Linq, JavaScript, jQuery, Razor, AJAX, Bootstrap, Microsoft SQL Server, MySQL, Agile/Scrum, Git, Trello, Jira.

Education

Bachelor of Science in Computer Science and Engineering

Bangladesh University of Business and Technology
2020

Graduated with a strong foundation in computer science principles, data structures, algorithms, and software engineering.

Skills

- **Backend:** C#, .NET, .NET Core, ASP.NET Core, .NET Web API, Entity Framework Core, ADO.NET, Linq, Dapper, SqlKata.
- **Architecture & Design:** SOLID Principles, Design Patterns (Factory, Repository, Dependency Injection, Decorator), Microservices Architecture, Event-Driven Architecture, CQRS, Domain-Driven Design (DDD).
- **Performance & Monitoring:** Query Optimization, Caching Strategies (Redis), Application Insights, Serilog, ELK Stack, Profiling.
- **Advanced Patterns:** Async/Await, Task Parallel Library (TPL), Reactive Programming, Message Queues (RabbitMQ, Service Bus).
- **Testing & Quality:** xUnit, NUnit, Moq, Test-Driven Development (TDD), Integration Testing, Unit Testing, Code Review Leadership.
- **Front End:** React, HTML5, CSS3, Tailwind CSS, TypeScript, JavaScript, jQuery.
- **Database:** Microsoft SQL Server (Advanced T-SQL, Stored Procedures, Query Tuning), PostgreSQL, MySQL, MongoDB.
- **Tools & Frameworks:** Polly (Resilience), FluentValidation, Hangfire (Background Jobs), Serilog (Logging), Flyway (Database Migration).
- **Version Control & Collaboration:** Git (GitHub, GitLab), SVN.
- **Project Management:** Jira, Asana, Trello, Agile/Scrum Methodologies.

Certifications

- Web Development with .NET (BITM)
- ASP.NET Core MVC Web Application Training (Microsoft Cloud Skill Training Program)
- Microsoft Azure Fundamentals (Microsoft Cloud Skill Training Program)

Projects

Firsttrip | TechnoNext Software Limited | October 2024 – Present

- Web-based OTA platform that offers seamless booking for flights, hotels, holiday packages, visas, and Umrah services, simplifying your travel experience.

MyVelwire | Velwire Ltd | November 2022 – September 2024

- Web-based Office Management is a digital solution that streamlines and automates the day-to-day operations of an office through an accessible online platform.

CQM (Web based Citizen Queue Management) | Velwire Ltd | February 2024 – July 2024

- The Citizen Queue Management (CQM) system is a web-based application designed to streamline and optimize the process of managing queues in public service offices.

- It allows citizens to book appointments or take virtual queue numbers online, reducing wait times and improving service efficiency.

STREAMSTUDIO | Tulip-Tech Ltd | March 2021 – October 2022

- The most secure and reliable webcast platform in the global market.

HRMS | Optimum Solution and Services | July 2020 – February 2021

- A Human Resource Management System (HRMS) is a comprehensive software solution designed to streamline and automate various HR processes within an organization.

- It integrates key functions such as recruitment, employee onboarding, payroll management, attendance tracking, performance evaluations, and benefits administration into a unified platform.

Pharmacy | Optimum Solution and Services | February 2020 – June 2020

- The Pharmacy Management Project is a web-based solution designed to optimize the operations of a pharmacy.

- It integrates key functionalities such as inventory management, prescription processing, sales tracking, and customer management into a single platform.

Training

- Web Development with .NET under BITM
- ASP.NET Core MVC Web Application Training under Microsoft Cloud Skill Training Program
- Microsoft Azure Fundamentals Training under Microsoft Cloud Skill Training Program

Reference

Reference 1

Name: Suvasish Chowdhury

Organization: Beacontech Limited (Previous Organization OSS)

Designation: Sr. Software Engineer
